Skills

- **MERN Stack:** Proficient in MongoDB, Express.js, React, and Node.js, with hands-on experience in building full-stack web applications using the MERN stack

- **Front-end Development:** Skilled in HTML, CSS, JavaScript, and modern front-end frameworks such as React.js, Redux, and Material-UI.

- **Back-end Development:** Experienced in developing RESTful APIs, server-side logic, and database management using Express.js and Node.js.

- **Database Management:** Proficient in MongoDB, including data modeling, querying, and optimization techniques.

- **Authentication:**Proficient in Firebase for user authentication, including user sign-up, login, password reset, and integration with email/password, Google, and Facebook authentication providers.

- **Deployment:**I'm proficient in deploying web applications on Vercel, Firebase, and Netlify, ensuring smooth and efficient deployment processes.

- **Version Control:** Familiar with Git and capable of performing essential version control tasks, including creating repositories, branching, committing changes, and merging branches.

- **Interpersonal skills:** Leadership, Patience,Collaborative Team Player,Teamwork,Responsibility,Dependability

Achievements

- Completed *Programming Hero*'s Web Development Course in 2022-2023

Career Objective

Seeking a position as a MERN developer to apply and enhance my skills in building modern web applications. Committed to collaborating with experienced professionals, expanding my knowledge, and delivering impactful solutions that drive business growth and meet user needs.

Projects

7News - News Portal
Description:
7News is a cutting-edge news portal website offering real-time news articles across diverse categories. This innovative platform provides a user-friendly interface and an immersive reading experience.
Key Features:
- Real-time News Delivery: Delivers up-to-date news articles instantly, keeping users informed.
- Secure Authentication: Implements robust authentication features for secure user access.
- User-friendly Interface: Provides an intuitive and easy-to-use interface for seamless navigation.

Technologies Used:
React (frontend), MongoDB (backend), Firebase (authentication).
Live Site: 7News   GitHub: 7News

Toy CarMania
Description:
Toy CarMania is an engaging toy car website that allows users to explore, add, delete, and update toy car models. It combines front-end technologies like React with MongoDB for efficient data management.
Key Features:
- Real-time Updates: Keeps users informed with instant updates on toy car models.
- Secure Access: Implements robust authentication features for secure user interaction.
- User-friendly Interface: Provides an intuitive and seamless navigation experience.

Technologies Used:
React (frontend), MongoDB (backend), Firebase (authentication).
Live Site: Toy CarMania   GitHub: Toy CarMania
